DocuShare Advanced Document Viewer

File Annotation and Collaboration

Enable document collaboration. This is an add-on option to store all of your users' annotations on DocuShare Standard or Enterprise content management (ECM) system.

- Popular annotations include text box, pop-up note, highlight, lines, arrows, rubber stamps, polygons and polylines, rectangles and ellipses, and freehand
- A descriptive note can be included within each annotation, displayed when the mouse is placed over it
- Annotations can be exported inside TIFF or PDF files, burned into images, or saved separately

Multi-Format Document Viewing

Automatically open many image types with one viewer. Comprehensive viewing features go beyond common display tools to add thumbnail navigation, poster printing, image export, and many others.

Easily configure any of the following types to be opened with Document Viewer:

- TIFF (single and multiple page, stripped, and tiled) in all compression formats
- PDF (PDF edition only)
- PDF/A
- CALS Type 1 (Group 4) for Government and Military use
- C4 (JEDMICS)
- JPEG
- GIF
- BMP Bitmap
- HD Photo (JPEG XR)
- PCX/DCX Paintbrush
- AutoCAD™ (DWG, DXF, DWF) multi-layer, multi-layout
- IBM AFP (including MO:DCA, PTOCA and ABIC)
- JPEG 2000
- JBIG2
- SVG (SVG Spec 1.1)
- WSQ Fingerprint

Combine Documents

Want to deliver a PDF, four TIFFs, and a JPEG with a single mouse-click? You can select and deliver a package any combination of files and selected pages to be viewed or printed by your users as one virtual document. You can include property damage photos with insurance claims, home photos with mortgage applications, or assembly diagrams with parts lists.

Advanced Navigation Tools

Use your mouse, keyboard, menus, and controls to quickly move between images.

- Thumbnail navigation – Use your mousewheel, or click on the thumbnail to jump to a page.

DocuShare Advanced Document Viewer

- The table of contents window can be used to quickly navigate through image list files and PDFs (PDF edition)
- Search for text anywhere in a searchable PDF file and click to view that page (PDF edition)

Advanced Viewing Tools

- The magnifier lets you zoom a particular area of the image.
- Reference window provides a "birds eye view" and can be dragged to position the image.

Enhanced Image Display Options

- Anti-aliasing, which automatically improves bitonal image display
- Color smoothing, which evens out the "blockiness" that often occurs with highly-magnified or over-compressed color images
- Unicode support for thumbnail descriptors
- Set initial view display
- Set initial display rotation
- Mirror horizontal and/or vertical
- Preserve lines when scaling
- Invert colors
- Color smoothing
- Patented enhanced JPEG decoding
- Brightness and contrast adjustments
- Maintain scaling, position and orientation when paging

Printing Options

- Apply print options to bitonal, color, PDF, and CAD images independently
- Include or omit annotations in print
- Specify up to 3 lines of header and footer text to be printed. Macro support allows auto-insertion of print date, time, and other variables
- Specify poster printing options for large format images including shrink instructions, overlap settings, minimum size for poster printing, order of pages
- Permit auto-orient when different orientation saves paper on printed images

System Requirements

- Windows 11, Windows 10, Windows 8, Windows 8.1, Windows 7, Windows 7.1, and Windows Server 2012, Windows Server 2016, and Windows Server 2019.
