

## DAVupDoc Version History

Version	Date
<a href="#">DAVupDoc 3.5.0.0</a> Can install on 64 bit Windows as 32 bit application. Added ability to write to deletion date property for scheduled document destruction.	3/2/2011
<a href="#">DAVupDoc 3.4.1.0</a> Zip packages are first given a .tmp extension and renamed to .zip after the package is built to eliminate the possibility that DocuShare will try to ingest it before it's complete.	11/7/2010
<a href="#">DAVupDoc 3.2</a> Added support for DocuShare custom objects based on clones of the document object when loading files to DocuShare. Useful for separating documents from invoices, etc.	12/19/2009
<a href="#">DAVupDoc 3.1.1</a> Fixed open file dialog button and resized template editor window to ensure it fits on smaller displays.	10/02/2009
<a href="#">DAVupDoc 3.1</a> New templates include fields for CIM criteria, adds password encryption support, fixes the "&" character in hierarchy and filenames when used with CIM.	09/20/2009
<a href="#">DAVupDoc 3.0</a> Incorporates new Content Intake Module compatibility for 50X+ faster uploads.	06/12/2009
<a href="#">DAVupDoc 2.1.2</a> Now supports multi-level filing and pauses between uploads to reduce the creation of redundant collections.	12/22/2006
<a href="#">DAVupDoc 2.1.1</a> Adds verbiage for accommodating bad metadata and skips over badly malformed data files.	10/03/2006
<a href="#">DAVupDoc 2.1</a> Includes exception handling of documents with missing data.	02/23/2006
