

## FlexiCapture 12 Launch

2016-12-13 09:30 AM

Auto-learning

Classification scripts can be written

Classified by image, text, or rules in either cascading or voting modes.

2016-12-15 09:30 AM

Find out more about sharding.

Versions are passed between stages to reduce load on system and lag time to users.

Licenses can be modularized for tenants with different needs.

e.g. FFO for one and FCI for another

Will there be hosted licenses for FFO applications for customers or will Unstructured be the base offering?

Tenants will have their own administrator and private reports.

Web Scanning Stations (new)

Better handling of digital-born documents such as PDF, Excel, Word, and HTML pages. Uses LibreOffice on same or another server.

Text from documents can be used rather than necessarily converted to an image first [?].

All email message properties can be captured now.

Cloud / hosting options.

Partner business model (ABBYY charges partner and partner charges customer)

2016-12-20 09:34 AM

Scalability and performance

Monitoring and analytics tools

HTML5

Multitenancy

SLA Support

export all docs to one pdf

joann

view mirror fields across doc set

doc. set summary

Scanning Station can now validate document integrity before sending and can receive jobs rejected by the processing server for rescanning.

New feature allows splitting a single scanned image into two or more pages.

<https://cloud-feature.abbyy-ls.com> (not ready yet)

Look into "solutions for managed care organizations".
